1. NATURE OF OPERATIONS

Golden Valley Mines Ltd. and its subsidiaries (hereinafter "The Corporation") specialize in the exploration and evaluation of minerals in Canada.

2. GOING CONCERN ASSUMPTION

The consolidated financial statements have been prepared in compliance with International Financial Reporting Standards (IFRS) and on the basis of the going concern assumption, meaning the Corporation will be able to realize its assets and discharge its liabilities in the normal course of operations.

Given that the Corporation has not yet determined whether its mineral properties contain mineral deposits that are economically recoverable, the Corporation has not yet generated income nor cash flows from its operations. As at March 31, 2012, the Corporation has a negative deficit of \$8,895,626 (\$8,288,404 as at December 31, 2011). These material uncertainties cast significant doubt regarding the Corporation's ability to continue as a going concern.

The Corporation's ability to continue as a going concern is dependent upon its ability to raise additional financing to further explore its mineral properties. Even if the Corporation has been successful in the past in doing so, there is no assurance that it will manage to obtain additional financing in the future. In January 2012, the Corporation completed a private placement for a total amount of \$675,000. See details in Note 10.

The carrying amounts of assets, liabilities, revenues and expenses presented in the consolidated financial statements and the classification used in the consolidated statement of balance sheet have not been adjusted as would be required if the going concern assumption was not appropriate.

Decreasing the loss per share would be antidilutive. Details of share options and warrants issued that could potentially dilute earnings per share in the future are given in Notes 11 and 12.

Both the basic and diluted loss per share have been calculated using the loss attributable to owners of the Corporation as the numerator, i.e. no adjustment to the loss were necessary in 2011 and 2010.

15. SUBSEQUENT EVENTS

On May 10, 2012, the Company announced that its wholly owned Canadian subsidiary, Calone Mining Ltd. ("Calone Canada"), had entered into an agreement (the "SPA") with K&K Investment GMBH ("K&K"), an Austrian company, pursuant to which K&K shall acquire, through a special purpose vehicle (the "SPV"), all of Calone Canada's shares held in its Sierra Leonean subsidiary, Calone Mining Company (S.L.) Ltd. ("Calone SL"). Amongst other things, as consideration for entering into the SPA, K&K is to: (i) ensure the funding and completion of an airborne electromagnetic geophysical survey; and (ii) subject to the right to repurchase a portion of the Royalty (as hereinafter defined) pay to Calone Canada a royalty (the "Royalty") equal to 5% of net returns from mineral products mined or removed from the Property within 10 years of closing of the transactions contemplated by the Funds currently held and future funds to be received by Calone SL are excluded from the transaction and are to be transferred to Calone Canada.

Following this announcement the investment in Calone SL, (capital stock of \$3,030 and advances of \$1,345,998) less the net cash expected to be repatriated by the Company (\$126,679), has been revalued at the fair value of the 5% royalty (\$1) and classified as asset held-for-sale. The difference between the carrying value of the investment in Calone SL and the fair value of the royalty is presented in the statement of comprehensive income as loss on measurement to fair value less cost to sell investment in Calone SL. A future tax benefit of approximately \$347,000 on the loss realized has not been recorded as it is uncertain that the Company will generate enough taxable income in the future to use it.
