Update on COVID-19

Following orders from the Governments of Québec and Ontario in response to the COVID-19 pandemic, from the period March 23, 2020 to May 11, 2020, the Company suspended its exploration activities and field operations in both provinces for the health and safety of the Company's workforce and its exploration partners. Corporate activity was limited to the Company continuing work on other commitments under existing third-party agreements and seeking partners to fund projects by way of option and joint venture agreements. On May 11, 2020, the Government of Québec announced and authorized the resumption of mineral exploration activities effective May 11, 2020.

At the Canadian Malartic Mine, where Abitibi Royalties owns various NSR and NPI, Agnico Eagle and Yamana reported on April 15, 2020 that the Canadian Malartic Mine had resumed operations following the Government of Québec's decision to authorize the resumption of mining activities. Canadian Malartic entered care and maintenance on March 24, 2020, in response to government restrictions related to COVID-19 that required mining companies to minimize operational activities.

At this time, the extent of the impact the COVID-19 pandemic may have on the Company is unknown as this will depend on future developments that are highly uncertain and that cannot be predicted with confidence. These uncertainties arise from the inability to predict the ultimate geographic spread of the disease, and the duration of the outbreak, including the duration of travel restrictions, business closures or disruptions, and quarantine/isolation measures that are currently, or may be put, in place.

Property claim renewals were deferred as a direct result of COVID-19 measures implemented by the *Ministère de l'Énergie et des Ressources naturelles* ("MERN") in Québec and the *Ministry of Energy, Northern Development and Mines* ("MNDM") in Ontario.

In Québec, the MERN has announced the term suspension of all claims currently in force for a 12-month period effective immediately on April 9th, 2020.

In Ontario, claim owners could apply for an exclusion of time through the *Mining Lands Administration System* ("MLAS").

PROPERTIES AND INTERESTS

The Company's exploration activities for the third quarter of 2020 focused primarily on managing and/or monitoring joint venture and/or option project exploration programs, and project generation activities directed to identifying and evaluating new opportunities and business development purposes.

Abitibi Greenstone Belt (“AGB”) Grassroots Exploration Project

The 18 AGB properties are comprised of gold (16), copper-zinc-silver (1), and nickel-copper-PGE (1) prospects located in Québec (8) and Ontario (10).

Golden Valley’s exploration strategy consists of a systematic approach designed to reduce grassroots exploration risk, and increase the possibility of exploration success, through the sequential exploration of a large number of grassroots properties. Preliminary fieldwork conducted over the Company’s properties typically includes grid establishment, geophysical and/or geochemical surveys, prospecting, reconnaissance and grid mapping and sampling, with the objective of upgrading and advancing each property to the group of “drill-ready” prospects.

OPTION AND JOINT VENTURE PROPERTIES

Abitibi Greenstone Belt (“AGB”) Programs

a) Amended Mining Option Agreement with Val-d’Or Mining Corporation

On April 18, 2017, the Company granted to Val-d’Or Mining an option to acquire a 100% interest in 61 of its grassroots properties, which option was amended and restated as of November 28, 2019 and exercised on December 5, 2019.

Pursuant to the option, Val-d’Or Mining is to issue 4,166,667 shares to Golden Valley on or before June 30, 2020 (issued) and 4,166,667 on or before December 31, 2020. In addition, Golden Valley is eligible to receive 20% of the proceeds of all third-party transactions pertaining to the properties that Val-d’Or Mining enters into and announces on or before December 31, 2022.

Further, the properties are subject to a royalty in favour of Golden Valley equal to 1.25% of the net smelter returns, whereby Val-d’Or Mining has a partial buyback right. The partial buyback right pertains to each individual property, whereby 1% may be bought for \$500,000 on a property by property basis with a maximum total consideration of \$5,000,000 at which point in time the NSR royalty on all the properties would be reduced by 1.0%.

For additional details with respect to the exploration and field work completed to date by Val-d’Or Mining, please refer to Val-d’Or Mining’s continuous disclosure documents available at the SEDAR website (www.sedar.com) by accessing Val-d’Or Mining’s issuer profile).

c) Centremaque Prospect – Alexandria Minerals Corporation (acquired by O3 Mining Inc.) - Val-d'Or Québec

On April 13, 2017, the Company granted an option to Alexandria Minerals Corporation (“Alexandria”) on the Centremaque Prospect located in the AGB, northeast of Val-d'Or, Québec. In order to acquire an 80% interest in the property, Alexandria must: (i) issue, over a four-year period from the date of signing, to Golden Valley such number of common shares in its capital having an aggregate value of \$250,000 based on the closing price of Alexandria's shares on the Exchange the day prior to the date of issuance of each tranche of payment shares, of which shares and/or cash in the amount of \$150,000 have been received to date; and, (ii) incur exploration expenditures in an aggregate amount of \$4,000,000 over the same four-year period. Once the option is exercised, the Company will retain a 20% free carried interest and a 1.5% NSR, with 0.5% of the NSR being subject to a buyback in favour of Alexandria for \$1.0 million payable to Golden Valley.

In accordance with the terms of the option agreement, Alexandria agreed to a \$2,000,000 work commitment on or before April 20, 2020. On April 3, 2020, O3 Mining provided a notice of force majeure and extension of delay as a result of the government of Québec's decision, relating to COVID-19, to close all non-essential businesses. The time for the performance of O3 Mining's obligations under the option agreement was extended for a period equivalent to the total length of the force majeure, which ended on May 11, 2020.

For additional details with respect to the exploration and fieldwork programs completed to date on the Centremaque Prospect, as well as for the details on the expenditures made to date on the project by O3 Mining Inc (“O3 Mining”), which acquired Alexandria in 2019, please refer to O3 Mining's continuous disclosure documents available for viewing by the public through the internet at the SEDAR website (www.sedar.com) by accessing O3 Mining's issuer profile.

d) Sharks and Cheechoo Joint Venture - Sirios Resources Ltd. - James Bay Northern Quebec

On October 23, 2013, Golden Valley granted Sirios Resources Ltd. (“Sirios”) an option to acquire Golden Valley's remaining 55% interest in the Cheechoo prospect. Sirios completed all its obligations under the agreement to earn a 100% interest in the Cheechoo prospect and therefore holds 100% of the Cheechoo prospect, subject to the royalty described below.

As additional consideration for the grant of the option, Sirios granted to Golden Valley a royalty equal to 4% of the net returns from all mineral products mined or removed from the Cheechoo gold project. Notwithstanding the foregoing, the royalty relevant to gold mineral products mined or removed from the Cheechoo gold prospect may vary between 2.5% and 3.5% depending on the market price of gold at the time of the payment.

For additional details with respect to the exploration and field work completed to date on the Cheechoo gold project, as well as for the details on the expenditures made to date by Sirius on the project, please refer to Sirius' continuous disclosure documents available for viewing by the public through the internet at the SEDAR website (www.sedar.com) by accessing Sirius' issuer profile.

e) AGB Properties – Eldorado Gold Corporation – Québec and Ontario

In 2008, the Company earned a 70% interest in the group of 9 properties (8 gold and 1 copper-zinc-silver) located in the AGB (Québec and Ontario) and a 70:30 joint venture (the “GZZ-I JV”) was formed between Golden Valley and Eldorado Gold Corporation, with the latter having acquired its interest through the acquisition of Integra Gold Corporation. Golden Valley is the operator for the joint venture. The GZZ-I JV is subject to underlying royalties ranging between 3.0% and 3.5% in favour of the original vendors, one of whom is a director and an officer of the Company. No exploration work was completed on the joint venture properties for the three months ended September 30, 2020.

PROPERTY INTERESTS ASSIGNED TO THE REPORTING SUBSIDIARIES

ABITIBI ROYALTIES INC.

Abitibi Royalties holds interests amongst others, in the following assets:

The Canadian Malartic Mine, where Abitibi Royalties owns various Net Smelter Returns (“NSR”) and Net Profit Interests (“NPI”), is jointly operated by Agnico Eagle Mines Limited (“Agnico Eagle”) and Yamana Gold Inc. (“Yamana”) (the “Partnership”). Abitibi Royalties' NSRs and NPIs cover portions of the Odyssey (3% NSR), East Malartic (3% NSR), Sladen (3% NSR), Sheehan (3% NSR), Jeffrey (3% NSR), Barnat Extension (3% NSR), Gouldie (2% NSR) and all of the Charlie Zone (2% NSR). In 2018, Abitibi Royalties acquired a 1.5% NSR on the Midway Project and a 15% NPI on the Radium Property, all operated and located at the Canadian Malartic Mine. With the exception of two zones (Jeffrey and Barnat) at the Canadian Malartic Mine, Abitibi Royalties' core royalties are not yet in production.

At the time of the sale of the Malartic CHL Prospect (the “Prospect”) in 2015 to Canadian Malartic GP whereby Abitibi Royalties received as consideration a 3% NSR on the Prospect, no cost for accounting purposes has been assigned to the 3% NSR as the Prospect was still at its early stage of exploration and future cash flows could not be reliably estimated. Similarly, at the time of the purchase of Abitibi Royalties' other royalty interests, the properties associated with the royalty interest were either: (a) in the early stages, (b) considered to be speculative, (c) expected to require more than two years to generate revenues, if ever, and/or (d) were currently not active. As such, acquisition costs of the royalty interest were recorded in the consolidated profit or loss and thus royalty interests of Abitibi Royalties do not appear on the Company's consolidated Statement of Financial Position.

RISK AND UNCERTAINTIES

COVID-19

At this time, the extent of the impact the COVID-19 pandemic may have on the Company is unknown as this will depend on future developments that are highly uncertain and that cannot be predicted with confidence. These uncertainties arise from the inability to predict the ultimate geographic spread of the disease, and the duration of the outbreak, including the duration of travel restrictions, business closures or disruptions, and quarantine/isolation measures that are currently, or may be put, in place. Adverse effects of coronavirus developments on consumer confidence, market stability and public health creates uncertainties on macroeconomic conditions and may also result in closures, cancellations of, or reductions in operations or production on properties where the Company and its subsidiaries hold royalty interests.

Climate Change

The Company has properties, joint venture agreements and/or royalties in various regions and jurisdictions where environmental laws are evolving and are not consistent. A number of governments or governmental bodies have introduced or are contemplating regulatory changes in response to the potential impact of climate change, such as regulation relating to emission levels. If the current regulatory trend continues, this may result in increased costs directly or indirectly affecting the Company. In addition, the physical effect of climate change, such as extreme weather conditions, natural disasters, resource shortages, changing sea levels and changing temperatures, could have an adverse financial impact on operations located in the regions where these conditions occur, directly or indirectly impacting the business of the Company.

Nature of Mineral Exploration and Mining

There is no known mineral resource on any of the Company's property interests. Mineral exploration and development involve a high degree of risk, requires substantial expenditures and few properties that are explored are ultimately developed into producing mines.

Mineral Deposits and Production Costs; Metal Prices

The economics of developing mineral deposits are affected by many factors including variations in the grade of ore mined, the cost of operations, and fluctuations in the sales price of products. The value of the Company's mineral property interests is heavily influenced by metal prices. There can be no assurance that the prices of mineral products will be sufficient to ensure that the Company's properties can be mined profitably.

Exploration and Development Risks

Resource exploration and development is a speculative business, involving considerable financial and technical risks, including the failure to discover mineral deposits, market fluctuations and government regulations, which are beyond the control of the Company.

Additional Financing

Future exploration and development activities will require additional equity and debt financing. Failure to obtain such additional financing could result in delay or indefinite postponement of exploration and development of the property interests of the Company.

Stress in the Global Economy and Financial Condition

The adverse effects on the capital markets generally make the raising of capital by equity or debt financing much more difficult and the operators of properties where Abitibi Royalties royalty and other interests are dependent upon the capital markets to raise financing.

Competition

The mineral exploration and mining business are competitive in all of its phases. The Company competes with numerous other companies and individuals, including competitors with greater financial, technical and other resources than the Company's, in the search for and the acquisition of attractive mineral

properties. There is no assurance that the Company will continue to be able to compete successfully with the competition in acquiring such properties or prospects.

Dependence on Key Individuals

The Company is dependent on a relatively small number of key personnel, the loss of any one of whom could have an adverse effect on the Company. The Company does not maintain key-person insurance on the lives of any of its key personnel. In addition, while certain of the Company's officers and directors have experience in the exploration of mineral producing properties, the Company will remain highly dependent upon contractors and third parties in the performance of their exploration and development activities. There can be no guarantee that such contractors and third parties will be available to carry out such activities on behalf of the Company or be available upon commercially acceptable terms.

Political Regulatory Risks

Any changes in government policy may result in changes to laws affecting the Company's ability to undertake exploration and development activities in respect of present and future properties.

Currency Risk

Currency fluctuations may affect the cash flow which the Company may realize from its operations, since most mineral commodities are sold in a world market in U.S. dollars. The Company's costs are incurred primarily in Canadian dollars.

Conflicts of Interest

The directors and officers of the Company will not be devoting all of their time to the affairs of the Company. Discharge by the directors and officers of their obligations to the Company may result in a breach of their obligations to the other companies, and in certain circumstances this could expose the Company to liability to those companies. Similarly, discharge by the directors and officers of their obligations to the other companies could result in a breach of their obligation to act in the best interests of the Company.

Insurance

The Company does not have insurance to adequately protect itself against certain risks associated with mineral exploration. Even if they were to obtain insurance, the Company will remain at risk and will be potentially subject to liability for hazards which it cannot insure against or which it may elect not to insure against because of premium costs or other reasons.

Influence of Third-Party Stakeholders

The lands in which the Company holds interests, or the exploration equipment and roads or other means of access which the Company intends to utilize in carrying out work programs or general exploration mandates, may be subject to interests or claims by third party individuals, groups or companies. In the event that such third parties assert any claims, the work programs of the Company may be delayed even if such claims are not meritorious. Such delays may result in significant financial loss and loss of opportunity for the Company.

Fluctuation in Market Value of Shares

The market price of a publicly-traded stock is affected by many variables not directly related to the corporate performance of the entity, including the market in which it is traded, the strength of the economy in general, the availability and attractiveness of alternative investments, and the breadth of the public market for the stock. The future effect of these and other factors on the market price of the Company's shares on the Exchange cannot be predicted.

Derivatives instruments

Due to the complex nature and market volatility that may influence the market value of the shares, selling of call and put options is subject to risk including limiting the potential upside gains and being obligated to purchase the underlying shares above the current market value. Although all risks cannot be eliminated, the Company is mitigating these risks by owning the underlying shares or having the cash requirement to meet its obligations.
